

Conklin Fastrack for Horses

To maintain healthy immune and digestive systems, your horses will benefit from a feed supplement program that uses the highest quality-controlled, direct-fed microbials.

Fastrack Supports:

- Feed efficiency
- Energy and stamina
- Immune response
- Hoof and hair growth
- Fertility
- Hoof strength

Programs For:

- Breeding facilities
- Performance horses
- Show horses
- Miniature horses
- Draft horses
- Working horses

The Fastrack Advantage

Conklin's Fastrack products are packed with beneficial yeast, lactic acid-producing bacteria, prebiotics, bacterial-derived enzymes, fungi, and vitamins—components that aid in the immune response and digestive health of your animal. Fastrack offers a wide variety of microbial products that can be conveniently added to your management system.

Try our progressive array of gels, microbial packs, and other supplements that support overall health throughout all stages of your animal's life cycle.

Conklin Fastrack Products

Fastrack® Equine Microbial & Enzyme Pack

Top-dress this concentrated direct-fed microbial daily to support health and performance. Specially formulated to provide lactic acid-producing bacteria, yeast metabolites, and enzyme-producing bacteria for protein, starch, fat, and cellulose digestion.

Fastrack® Microbial Pack

Top-dress on feed daily to help enhance microbial activity in the digestive tract to assist with feed utilization.

Fastrack® Equine Gel Ultra

A kick of fast-acting microbial activity to help in times of stress. Fastrack Equine Gel Ultra supports the immune system and complements maternal antibodies when given to foals. Supplement prior to transportation to aid travel-related GI stress.

Fastrack Fortifier®

Packed with vitamins, minerals, yeast metabolites, antioxidants, and enzymes to support the needs of your horse during competition and times of stress. Additional ingredients aid joint health and decrease recovery time following strenuous training. Use in conjunction with Fastrack Equine Microbial & Enzyme Pack to maximize results.

Suggested Product Usage:

Foals, Weanlings, and Growing Horses:

Fastrack Equine Gel Ultra

1 - 2 mL per foal at birth, days 3 and 5, weaning, and periods of irregular feed intake.

Fastrack Equine Microbial & Enzyme Pack

¼ - 1 oz. per horse per day top-dressed on feed from weaning to maturity.

Fastrack Microbial Pack

½ - 2 oz. per horse per day top-dressed on feed from weaning to maturity.

Fastrack Fortifier

¼ - ½ oz. per day top-dressed on feed during challenging periods.

Mature, Breeding, Showing, and Senior:

Fastrack Equine Gel Ultra

1 - 4 mL per horse at worming, transporting, and periods of irregular feed intake.

Fastrack Equine Microbial & Enzyme Pack

½ - 1 oz. top-dressed on feed per horse per day.

Fastrack Microbial Pack

1 - 2 oz. top-dressed on feed per horse per day.
